

Shit Merchandise

A division of Wilson Megacorp Ltd

All deals are final, and you'd better give me a good review or else!

Books and Literature

You name it we've got it!

Here at Wilson Megacorp we're a great believer in recycling to care for our planet and thus deprive publishers of their revenue. Valuable cash that would normally go to fund budding new writers instead goes to fund my dodgy share dealings in the far east.

Everything from Cadfael mysteries to the pop up Karma-Sutra

Most in reasonable condition with only the odd library stamp in a few. We cater for all tastes but mainly exploiting the bored housewife tacky love interest novels. As our founding director P.S. Wilson states: "Adi, if I can fucking flog it to some dumb bastard I will!" Wise words I think you'll agree.

Dug an old bike frame out of the canal recently...

Then let Wilson Megacorp help you restore it to it's former glory, with our extensive range of out of print Haynes Manuals. Sourced from over 20 odd local carboots, I'll export my rubbish, I mean merchandise to anywhere on the globe if the postage mark up is right.

Shit Leisure wear

Smashing Shit Cordoroy Casual Slacks. (Cack color)

Look every piece the stylish man about town with these off the peg Oxfam cordoroy's. Be the envy of every Greenham common demonstrator and homeless bum. RRP 30p

Navy Blue Eccentric Lecturers Ex-Army Stock Sweater

No-one will ever take you seriously once this is worn. Avoid awkward social invites by wearing this a few times to put people off. Classic Falkland squaddie stying with leather elbow pads makes this a must have for every social misfit.

Wide range of designer jumper styles

As knitted by Auntie Helga at Christmas. This facinating range of unworn and unwanted Xmas Gifts would suit the wardrobe of any budding Noel Edmonds

Please enquire about our extensive range of jumble sale cast offs. There's something here to suit all pockets. (Especially those with holes in them)

Computer Supplies and peripherals

A varied and wide range of out of date computer tat. Burnt out circuit boards and faulty CD roms my specialty. Ask to see my range of obsolete chips to expand your computer capacity, by knackerung up -

- your existing machine, thus forcing a premature visit to PC World. A wide range of hooky Windows and CD copying software also available under the counter. Just ask!
